

Unit 1, Lesson 2, Activity 1

Activity 1, sheet 2: Fill in the chart with as many examples as you can. If there are no examples in a particular category briefly explain why.

Type of Pest Management	Pest (Insect, disease, weed or animal)		
Cultural Horticultural practices or environmental modifications that limit pest problems			
Mechanical Use of devices or actions that physically remove the pests or prevent pest access to the crop or site			
Biological Use of natural enemies that attack and suppress pest populations			
Chemical Purposeful application of compounds that influence pest success (development, growth, survival)
