

Name _____

Introduction to IPM

- 1.) List and briefly explain the five components of IPM.
 - 1.) *Prevention- keeping plants healthy, keeping pests out of home,*
 - 2.) *Monitoring- What, when, where & how. Looking for pests.*
 - 3.) *Decision Making- What is the pest, learn about the pest, decide if management is needed*
 - 4.) *Treatment-treating the problem*
 - 5.) *Evaluation- keeping records.*
- 2.) A "pest" is:
 - a. Any insect or animal anywhere.
 - b. An insect in a garden or yard.
 - c. *Any organism anyplace where it is not wanted.*
- 3.) T/F An organism is always classified as either not a pest or as a pest. They cannot change their classification ever.
- 4.) What is one pest in or around your home? Give one way to control this pest. *Can have multiple answers. Evaluate to determine if answer is reasonable.*
