

Unit 1, Lesson 3, Activity 1

Name _____

Introduction to Plant Pathology

Choose your favorite plant, tree, vegetable or fruit. Find the common and scientific name of the plant. Then find two different diseases caused by different groups of plant pathogens (fungi, oomycetes, bacteria, viruses or nematodes) and complete the information on the worksheet.

Plant's common and scientific name:

	Disease 1	Disease 2
Disease Name		
Pathogen group		
Plant part (s) affected		
Symptoms		
Signs (draw signs if any)		
How does it spread?		

In the following diagram list how these pathogen groups are different and how they are similar?
